

X8 SuperSnake

PRODUCT INTRODUCTION MATERIAL
December 2018

Next-level productivity within your reach

The **X8 SuperSnake** combines the outstanding benefits of Kemppi's original SuperSnake subfeeder with the X8 MIG Welder's modern technology and precise arc control.

Extreme extension

The X8 SuperSnake guarantees a reliable wire feed while extending your regular reach with up to 25 meters.

- Suitable for Fe/Ss/Al/FCW/MCW filler wires
- 10/15/20/25-meter water-cooled models
- Parameter adjustment with the Control Pad or X8 Gun Remote Control
- Supports all Kemppi Wise special processes
- Strong protective frame included as standard
- A perfect choice for heavy and medium-heavy metal fabrication and installation work

NOTE! Kemppi's Welding Services team will give recommendations for **Al filler wire sizes** with cable lengths over 15 m on a case-by-case basis.

X3 Super Snake

Precise arc control

The X8 SuperSnake is compatible with X8 Wire Feeders and X8 MIG Guns.

The connection is established with **Kemppi Gun Connectors** that are known for their excellent mechanical and electrical properties and precise arc voltage measurement.

New technology enables support for Kemppi's **Wise special processes** and ensures optimal arc characteristics in any welding application.

Reliable wire feed assist

- The X8 SuperSnake features a two-roll version of the X8 Wire Feeder's **powerful wire feed mechanism** with firm locking.
- The consumables are
 - interchangeable for convenience and cost efficiency, and
 - color-coded to ensure that you always use the correct combination.

NOTE! LED cabinet lighting improves visibility in dimly lit work environments.

Comprehensive user interface

- The wireless **Control Pad** gives the welder the freedom to make any parameter adjustments at a significant distance from the welding system.
- The X8 SuperSnake also supports **X8 Gun Remote Control** when it is installed to the welding gun.

NOTE! If the Control Pad's signal becomes too weak or is out of range, it can be connected to the subfeeder with a cable.

Maximum durability

- The **strong protective frame** with base plate is included as standard to protect the subfeeder and cable connectors in even the toughest workshop conditions.
- **Drag it, drop it, roll it** – the X8 SuperSnake's position or angle does not affect its operation, as happens with regular wire feeders.

NOTE! Detachable cables can be easily replaced if they become damaged.

Improved ergonomics

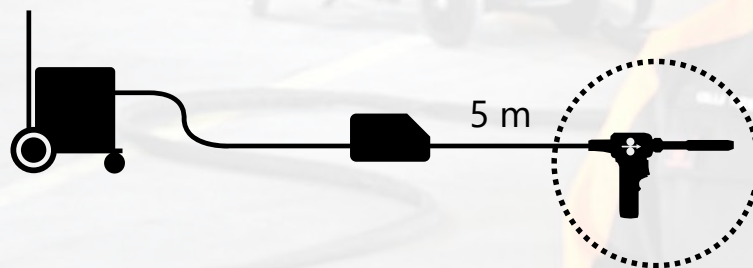

- The lightweight X8 SuperSnake is easy to carry to wherever it is needed. Not only does this improve **occupational safety** by removing the need to carry heavy wire feeders, but it also improves **productivity**.
- No need to use heavy push-pull welding guns that increase strain on the welder's wrist.
